

Accounting For MANUFACTURING

Industry Expertise

Olsen Thielen serves manufacturing clients throughout the industry. Here are just a few of the specialized areas our team works with:

Metal & Machinery

Fabrication, machining, stamping, industrial and commercial equipment

Consumer & Processed Goods

Food, textiles, wood products, chemicals

Technology & Components

Electronics, software, and related systems

Expertise That Drives Results

Navigating rising costs and evolving regulations takes more than experience, it takes a partner who understands your industry. For decades, Olsen Thielen has helped manufacturing & distribution companies plan strategically and stay competitive with expert tax, accounting, and advisory services.

We're large enough to offer full-service expertise, yet small enough to deliver personalized, proactive guidance. Our goal is to help you operate more efficiently, grow profitably, and make confident decisions.

More Than Just Tax & Accounting

- Tax planning
- Audit, review, compilation
- Internal controls
- R&D credits
- Cost & budgeting analysis
- Inventory pricing
- Business valuations
- Retirement & benefits
- Succession planning
- Mergers & acquisitions
- Forensic accounting
- Foreign taxes

"I have always felt like Olsen Thielen was a partner and not just an accounting firm. They are all part of the team."

Paul Mooty, Vice Chairman and Partner
Faribault Woolen Mill Company
